The analysis of the water by Prof. Mallets, of the University of Va., together with the experience of many emisent Physicians prove that it is "the springs" for suffering females, but besides its winderful tonic properties as a remedy in general debility, sammin and diseases peculiar to females, it is unsurpassed in the treatment of the various forms of Dyspepsia, and particularly for those suffering from torpid and inactive liver, its action upon the liver, as well as the kidney, being prompt and decided. Very many remarkable cures could be cited of this class of troublesome diseases.
